FY 2025	\$9.030 Billion	+2.2%	+\$190 Million

Total funding and percentage increases were taken directly from HB 1001 (the budget) and the School Funding Formula summary page. Sometimes in the first year of two budget years, the previous budget amount was not fully spent and the adjusted lowered base was used by the General Assembly to calculate the increases and percentage changes. In this historical listing, the amount passed in the previous budget is used as the baseline to calculate increases and percentage changes.
